

GS Emulation

Cloud emulation wherever you are

Overview

- Web based emulator. No installation is required
- Access any time from your browser, wherever you are
- SSL-secured
- Supports IP Filter
- Compatible with Android, Windows and Ubuntu
- Access in the cloud or on the organization servers

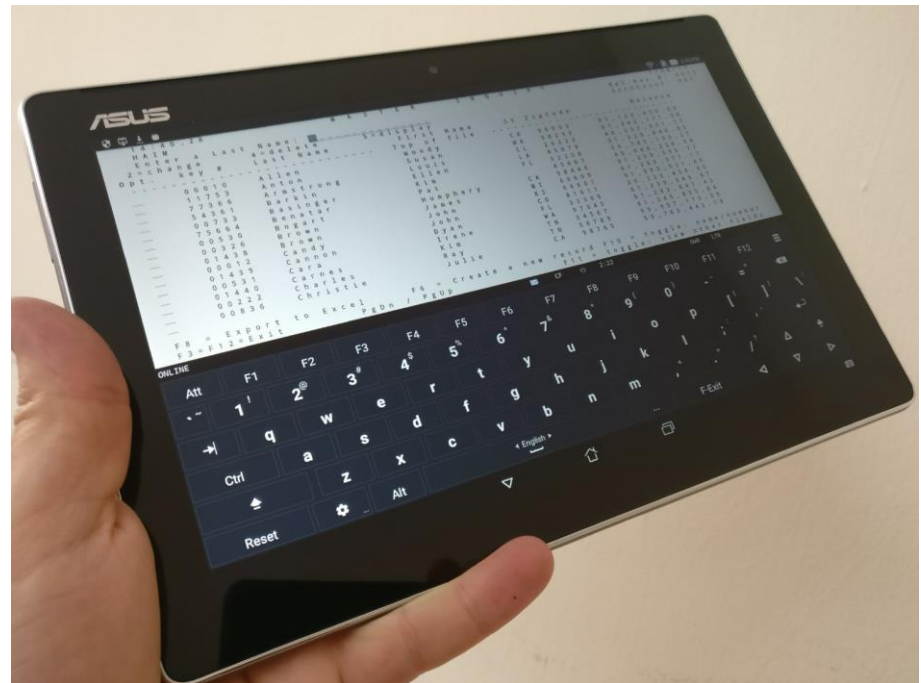

```

- Supports tablets and Android smartphones
- Keyboard adapted to work in emulation
- Automatic keyboard popup in input fields
- Automatic screen rotation and adjustment

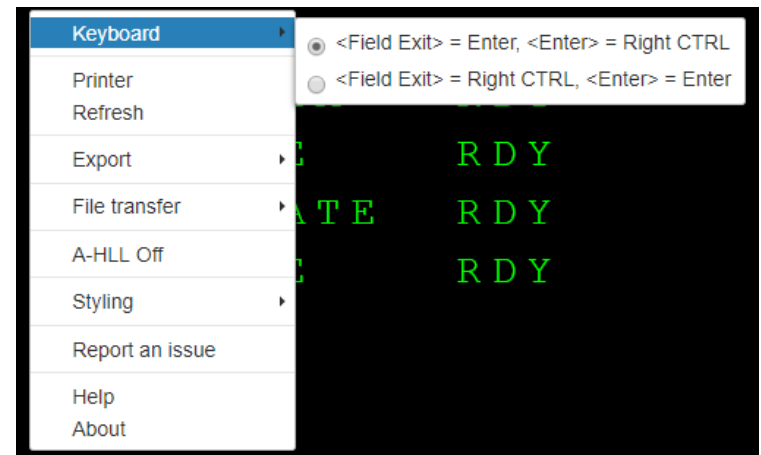

- Touchscreen gesture support
- Barcodes read and sent from camera directly to the screen input fields
- Session kept open even if communications are disconnected

Full mobility: Work inside and outside the organization without exposure of IBM i system with SSL-secured protocol

Customize the emulation's setting to your needs.
Changes are immediate without having to restart the emulation

- Swap Enter key for Field Exit
- Define or change Printer's name
- Macro and file transfer support
- Selection of several different printing formats (PDF, HTML, TXT)
- Adapt background colors and font brightness while working, to adjust to different lighting conditions

- Printouts open as PDF whether or not there is a physical printer. The end user can save, print and send the printouts by email
- Prints directly to your printer even when emulation is not active

- JavaScript support for processes automation on the emulation screen and for integration in advanced Web environments, e.g. PHP
- Allows a variety of commands to the emulation directly from the CLP program, improving user experience and granting user friendliness
 - Dynamic printer selection
 - Sending of alerts
 - Sending of bell sound

```
Request Level: 4
Previous commands and messages:
> STRPCCMD PCCMD('script:Tn5250.Prompts.message('Info', 'Houston we have
a problem')') PAUSE(*NO)
```

Info
Houston we have a problem
OK

GS Emulation

Dynamic printer selection

```
STRPCCMD PCCMD('script:Tn5250.Application.startPrinter("PRT01")')
```

Control of keyboard "pop-up"

```
STRPCCMD PCCMD('script:Tn5250.KeyBar.disable()') PAUSE(*NO)
```

Playing sounds at PC station

```
PCCMD('script:${".view"}.fadeIn(100).fadeOut(100).fadeIn(100).fadeOut(100).fadeIn(100);')
```

Sending of alerts

```
STRPCCMD PCCMD('script:Tn5250.Prompts.message("Info", "Houston we have a problem")')
```

All the existing commands and many more are controlled directly from the CLP program in AS/400

Dynamic execution of actions modifying the emulation behavior from the organization information system

GS Emulation A Customer Story

Lee Cooper had to connect the IBM i system to the national chain of branches to allow queries from individual stores. 190 branches had to be connected rapidly to the emulation screens.

The problem was the installation of emulation software in all the branches on the user PC acting as cash register – a PC critical for the branch's activity. Due to the amount of work required and the risk of installation in a critical PC Lee Cooper had to think outside the box.

The VRTECH solution came at the right time. Emulation in a browser without modifications in the cash register PC.

With GS Emulation all the branches received cloud emulation services without installation in end stations. Through a browser the branches obtained quality emulation allowing simple and secure work.
