

# Fail-Safe

Safe way to monitor  
AS/400 processes

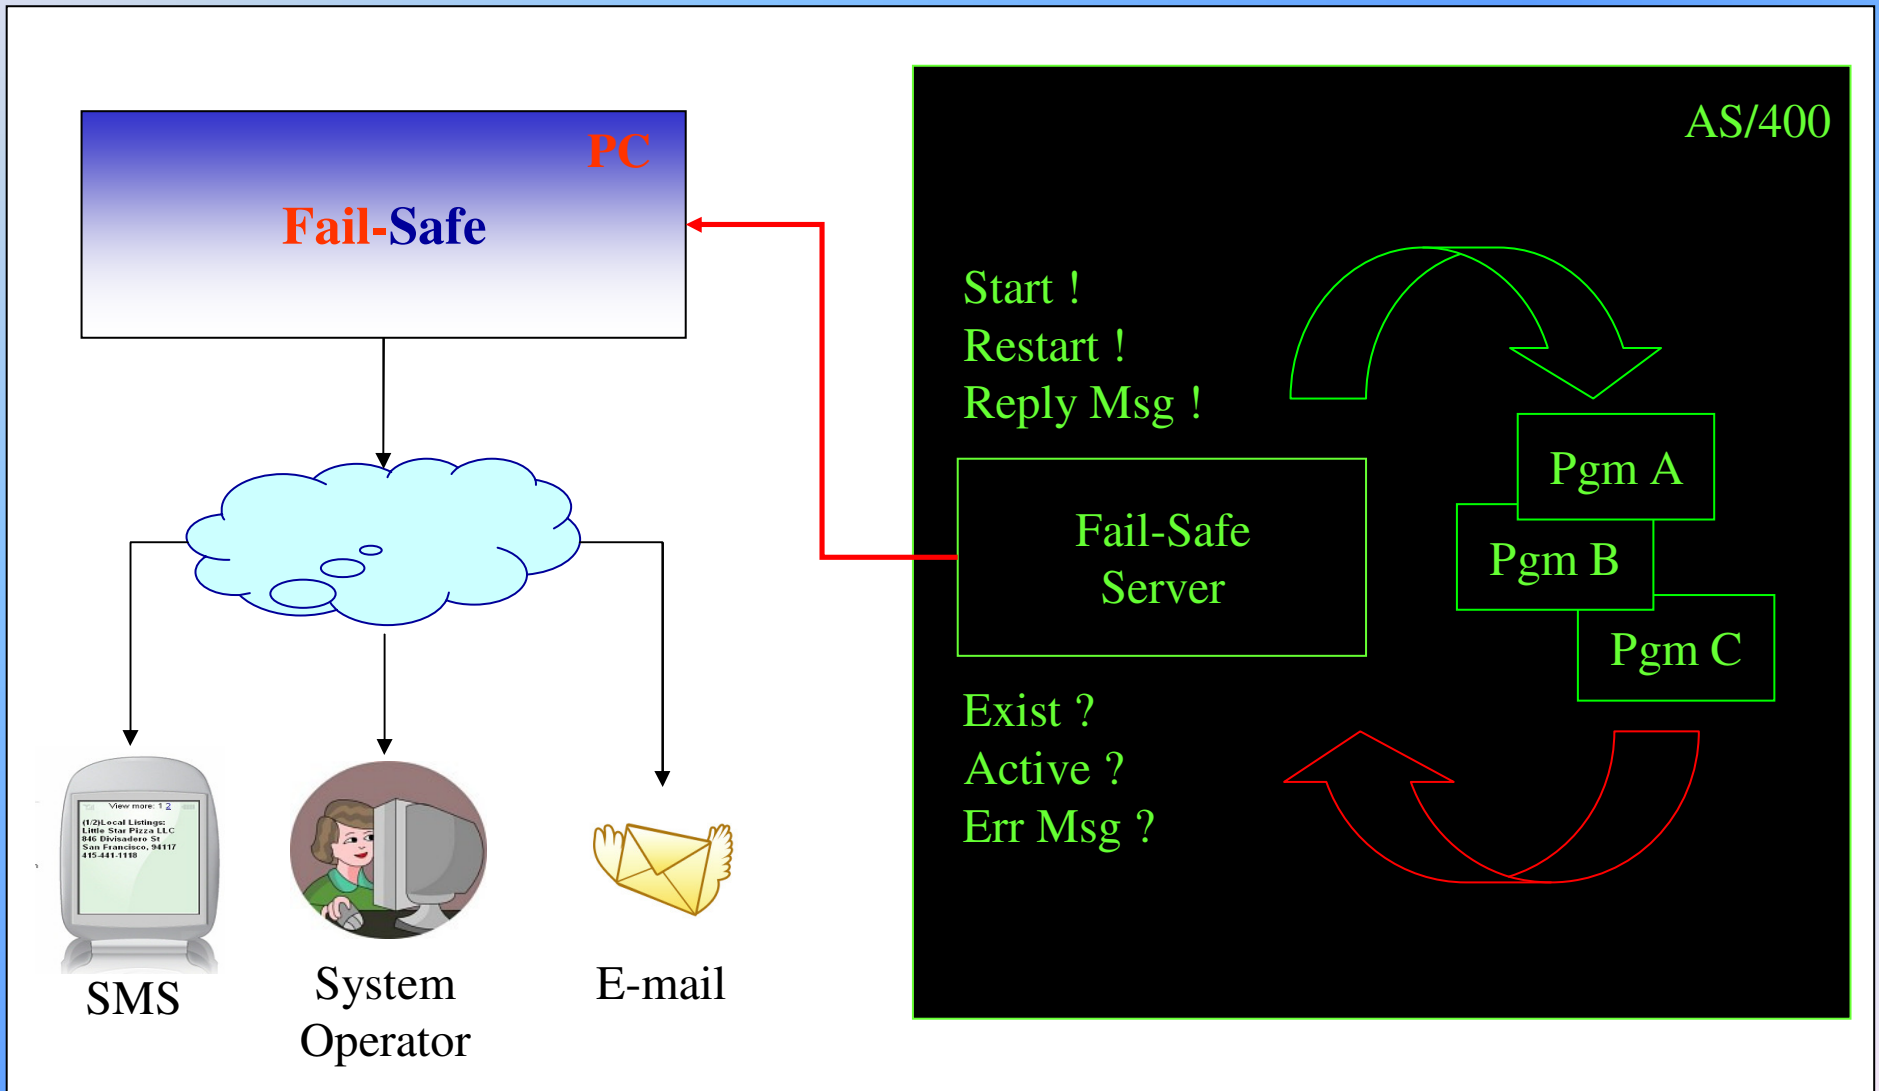

# Fail-Safe

Fail-Safe allows monitoring important programs/processes running on AS/400.

If a program failed or is inactive, the system responds by a predefined action such as:

- ✓ Issuing an error message (Reply Message)
- ✓ Restarting the software
- ✓ Reporting the incident to various addressees within the organization by e-mail or SMS
- ✓ Other action specified by the user
