

MessageIt/400

*Easy way to send spool files via Mail,
Fax and SMS*

MessageIt/400

- **MessageIt/400** is a messaging tool that allows you to send AS/400 spool files by mail, fax, and SMS to a remote location.
- **MessageIt/400** intercepts spool files in the AS/400 out queues and extracts the recipient's address or fax/SMS number directly from the spool file

MessageIt/400

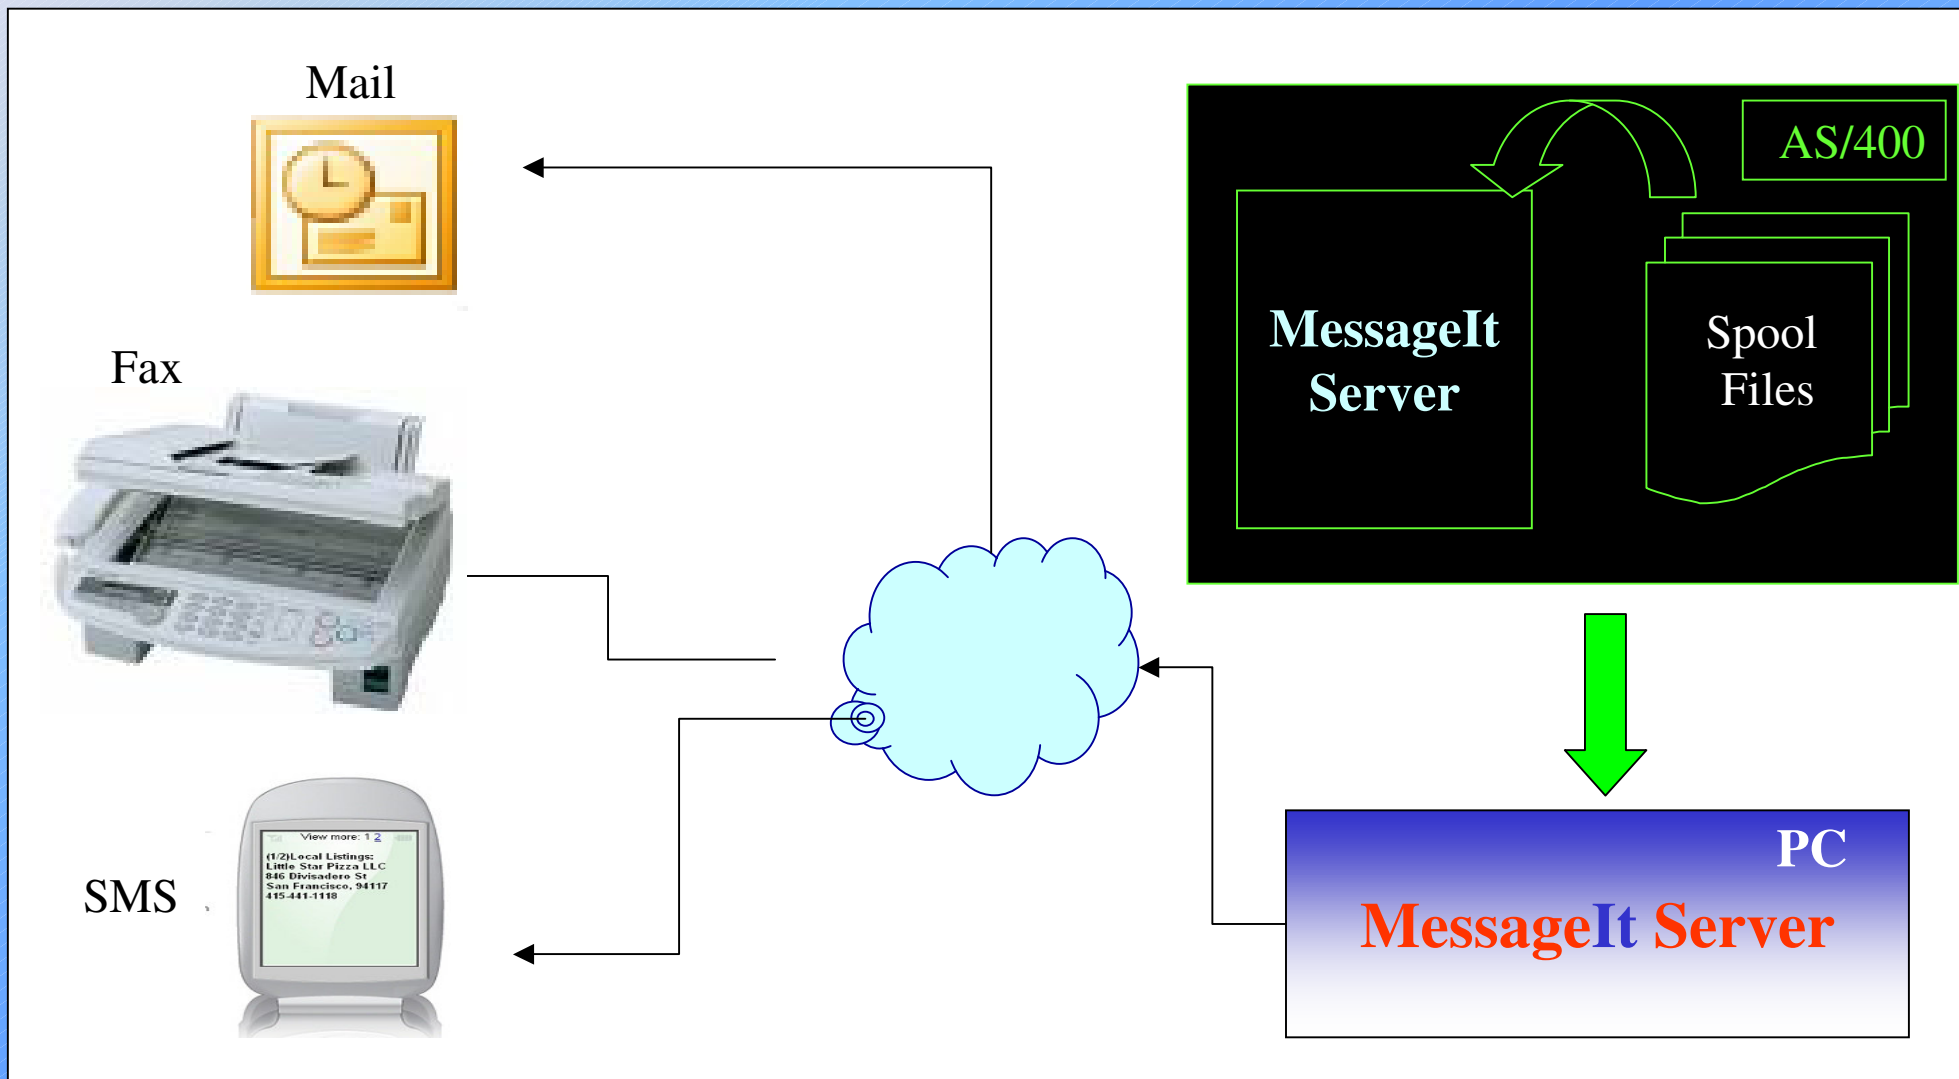

MessageIt/400 contains two components: the AS/400 module and the PC module.

The AS/400 module intercepts spool files from selected out queues. The spool file is transmitted to the PC and sent to the recipient as an attachment in TIFF/PDF format through MS Outlook, MS Fax, or SMS.

MessageIt/400

- Send invoices, orders, and other printouts from AS/400 directly to the client's or supplier's mail box or fax machine .
- Distribute reports to mailing groups .
- Send SMS messages from the AS/400 system.

MessageIt/400

Advantages

- Implementation is quick and easy, with minimal cost.
- Maintenance is simple.
- No code modifications are required in the legacy system application.
- No need to specify recipient address or fax/telephone number, which are extracted automatically from the printout.
- No need to define SMTP or POP3 in AS/400, to ensure maximum security.
